

Lessons from the Bay Process Model

Planning Your Presentation

Steps	Your notes
1. Gather all the notes from your group's research, observations, and actions.	
2. Review the organizing and supporting questions.	
3. Decide who will introduce the presentation.	
4. Decide who will talk about each supporting question.	
5. For each supporting question, be sure to include a summary of the research, observations, data collection, hypothesis, and actions.	
6. Select pictures, Web sites, photos, natural specimens, or other sight and sound resources to illustrate your group's work.	
7. Think of other ways to make your presentation interesting to the audience.
